Catalogue of South African Native Seeds, Bulbs and Succulent Plants

Grown by

K. C. STANFORD

Bloem Erf, Stellenbosch, South Africa

JANUARY, 1934

Monsonia Speciosa

This year I am sending out my list sooner to enable customers to get their bulbs planted earlier in the season. Packets of bulb seeds consisting of not less than 50 seeds are reduced to 1/6, except where marked *, when they are 2/6.

It is impossible to quote prices in American currency as the exchange varies. Bulbs are sent out January to May; seeds all the year. Bulbs 5/- per dozen except where price is stated.

Customers in U.S.A. cannot import bulbs without a permit.

Trade lists to nurserymen on request.

Look out for the novelties and order immediately. Stocks of these are not large.

Try some S.A. annuals, something new each season.

GLADIOLUS.

Gladiolus blandus—Known as "the fairest Gladiolus," typical "Painted Lady" colouring. 1-1½ ft., up to 20 blooms on a stem often branched.

• **G. cardinalis**—"The Superb Gladiolus," long sprays of large carmine-red flowers with white throat markings outlined in dark red. Likes moist, shady situation.

• **G. gracilis**—The earliest to bloom, 1-2 ft. high, very graceful, flowers blue or buff marked with yellow on the lower lip. One of the prettiest.

• **G. hirsutus**—Large deep pink blossoms, striped white. Sweetly scented. Very robust and handsome. 7/6 per dozen.

• **G. callistus**—3 ft. high, flowers well spaced on stem, pale pink or white with deeper throat markings. Manner of growth reminds one of Prim. hybrids.

• **G. angustus**—Very branched, of the "Painted Lady" type, with very long narrow perianth tube.

• **G. odoratus**—Very desirable species, winter blooming, flowers large, marked brown or maroon. Very sweet hyacinth scent. Price 10/- per dozen.

• **G. alatus or Kalkoenje**—A very distinct type, useful in hybridizing. Large flowers terra-cotta, with green or yellow on lower segments. Sweet scented. 6 in.-1 ft. 3/6 per dozen.

• **G. psittacinus variety Hookeri**—Height 5 ft., 14-20 large blooms on strong stems. Flowers brilliant scarlet with orange on lower lip. Flowers late autumn.

• **G. tristis (Syn. G. aestivalis. Ingram)**—Height 4-6 ft., very thin stems, 10-20 on a spray, pale yellow, mottled brown. Evening scented. Flowers mid-summer. 3/6 per dozen.

• **G. tristis**—Height 1 ft., two or three large blooms on a stem; good creamy yellow marked brown on outside of segments. Flowers early spring.

• **G. grandis**—Resembles G. tristis but flowers are larger and 2-3 on a stem, usually reddish-brown or bronze, mottled with yellow. A most attractive flower of perfect form with pointed, waved segments. Very sweetly scented in evening, flowers midsummer. 4/- per dozen.

• **G. splendens**—Very distinct habit of growth. Flowers on long sprays resembling G. cardinalis but more delicate and more intense colour. Flowers autumn. Seed only.

• **G. orchidflorus (variety)**—Very sweetly scented. 1-1½ ft. high. 5 blooms open at a time. Chocolate brown with yellow green on lower lip. 7/6 per dozen.

• **G. Watermeyeri**—Flowers very early spring, scented. Flower large, resembling G. alatus. Cream, veined crimson. 7/6 per dozen.

Gladiolus gracilis.

• **G. formosus**—Flowers very early spring, delicate colouring in mauve and yellow.

• **G. brevifolius**—Very dainty. Pink or blue. Flowers end of summer, leaves later. Charming pot plant.

• **G. viperatus**—The famous green Kalkoenje. Shaped like Galatus, but much taller, sprays of green blooms marked brown. Very sweetly scented. 15/- per dozen.

• **G. pulchellus**—Very dainty sprays of soft pink marked yellow, quite a distinct species, type near G. formosus. 10/- per dozen.

• **G. alatus var.**—Somewhat larger than G. Alatus, dark band across lower segments. 10/- per dozen.

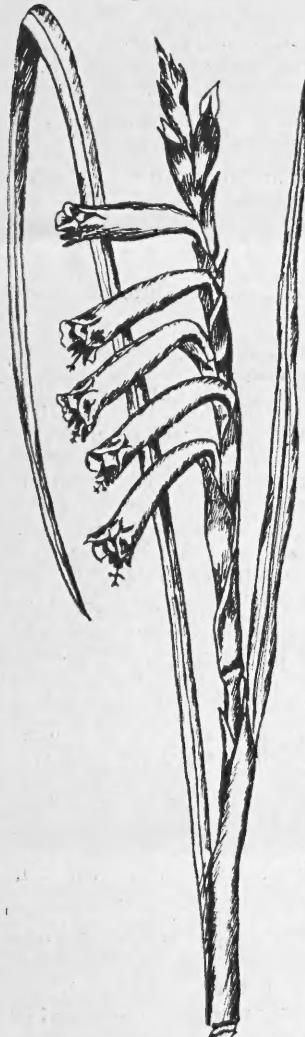

• **G. Namaquensis**—Very large edition of G. alatus, leaves wide with distinct red edge. Very rare, seed only. 2/- per dozen.

WATSONIAS.

Watsonias may be divided roughly into two classes, those that bloom in Spring or early Summer, becoming dormant in the hot weather, and those which flower from midsummer onwards and are evergreen. The first class likes a hot dry situation in well-drained soil, while the second likes plenty of moisture the year round. The first nine on this list come under the first heading.

W. meriana (variety)—Colour good rose pink. A more compact habit of blooming than the type and more showy. A very desirable species, good for cut flowers. £1 15s. per 100.

Watsonia aletroides.

hot well-drained situation. Height 1-1½ ft., spikes of brilliant blue flowers—not at all like a Watsonia.

New Watsonia species, at present not named:

1. Flowers orange. Large regular blooms on delicate stems, grey-green foliage. Height 2 ft.
2. Taller, flowers deeper orange. More robust foliage, dark flower stems.
3. Large orange red flowers. Very wide leaves, 5 ft.
4. Large salmon pink flowers, 5 ft.

LACHENALIA.

- * *Lachenalia aurea*—Flowers deep orange on good, long stems; flowers early.
- * *L. rubida*—Flowers very brilliant pink. Flowers very early.
- L. pustulata*—Flowers yellowish, slightly scented. 4/- per dozen.
- L. orchoides*—Flowers greenish, shading to mauve. 4/- per dozen.
- L. tricolor*—Flowers very large, in green, yellow and red. Splendid species. Flowers early. 4/- per dozen.
- L. unifolia*—Very pretty. Flowers sky blue, shading to pink.
- L. purpureo-coerulea*—Good lavender blue flowers, very showy.
- L. unicolor*—Height 1 ft. or more. Very many purple and green flowers closely packed.
- * *L. pendula*—Very large red flowers, tipped green. Blooms Winter. 7/6 per dozen.

BABIANA.

- Babiana stricta*—Crocus-like flowers of very deep blue. Excellent for borders or the rock garden. 4/- per dozen, 25/- per 100.
- * *B. stricta rubro-cyannea*—Deep blue flowers with brilliant red centres. One of the showiest of the Cape flowers.
- B. villosa*—Flowers from deep red to pale lavender. 3/6 per dozen.
- B. plicata*—Dwarf, very early flowering. Lavender flowers marked with primrose, and purple. Sweet scented. 3/6 per dozen.
- B. sulphurea*—The biggest of the Babianas, 1 ft. spikes of large white or cream flowers.

SPARAXIS.

Sparaxis tricolor—Very gay and free flowering, early spring. Flowers orange, brown or brick-red with all intermediate colours. 3/- per doz., 12/6 per 100.

Sparaxis grandiflora—purple

- S. grandiflora*—Cream—Tall free-flowering. 2/- per doz., 10/- per 100.
- S. grandiflora*—Purple—The most beautiful Sparaxis. Large flowers a deep velvety purple. 4/- per doz.
- S. Pillansii*—Very tall species. Flowers old rose with yellow centres. 3/6 per doz.
- S. bulbifera*—Very distinct and attractive species. Flowers a good clear yellow. 4/- per doz.
- * *S. Bloem Erf hybrids*—Very tall and large flowered, in shades of crimson, deep amethyst or yellow. Seeds of any of these species sown in autumn and kept growing will bloom the following spring.

TRITONIA.

Tritonia hyalina—Flowers deep salmon or orange on dark stems. Prices 3/6 per dozen, 25/- per 100.

- T. deusta*—Deep orange flowers with large brown spot on each of the three outer segments.
- T. lineata*—Taller than the others. Flowers cream with darker veins. Prices 2/6 per dozen, 10/- per 100.
- * *T. scillaris*—Very attractive, early flowering. 6 inch spikes of tiny deep pink flowers. Charming for the rock garden or pots in greenhouse.
- * *T. squallida*—Very attractive species, large flowers on short stems, in shades of old rose, salmon and flame.
- * *T. securigera*—Delicate flowers of light orange colours.

ARISTEA.

These plants make no corms or tubers and mostly very little root-stock and resent disturbance, therefore, only seed will be supplied. The seed germinates easily and they soon become established if planted out in the seedling stage.

Aristea spiralis—Very delicate pale blue flowers on one foot stems.

A. Ecklonis—Effective sprays of sky-blue flowers packed closely together. 2 ft.

- A. *capitata*—5 ft. sprays of deep blue flowers. When growing in masses on the hillsides it resembles clumps of delphiniums.
- A. *cyanea*—Plants make neat tufts, which, in the Spring, are covered with intensely blue flowers.
- A. *dichotoma*—Closely resembles A. *cyanea* but flowers midsummer and later.
- A. *platycaulis*—Plants make big clumps. Flowers on 3 ft. stems, individual blooms. Large. Blooms for a long period.

CYRTANTHUS.

- Cyrtanthus Mackenii*—White Ifafa Lily. Resembles a hyacinth but flowers in an umbel. Sweet scented, blooms winter. 4/- per dozen.
- C. *O'Briennii*—Similar to C. *Mackenii*, but flowers are a bright clear red.
- C. *parviflorus*—Flower slightly smaller than C. *O'Briennii* but flower an even brighter red.
- C. *Fergusoniae*—A most beautiful species, large cerise blooms, likes sand and lime stone. Very rare. Bulbs 1/9 each.

IXIA.

- I. *patens*—Large rose pink blossoms on stem 2-2½ ft. 4/- per dozen.
- I. *maculata*—Cream blooms with black centres. 3/6 per dozen.
- I. *Duckettiae*—Orange blooms, black centres. 2 ft. stems. 3/6 per dozen.
- I. *flexuosa*—Very delicate stems, pink flowers. 3/- per dozen.
- I. *lutea* (variety)—Flowers deep yellow, red on outside of segments. 3/6 per dozen.

- I. *viridiflora*—The famous Green Ixia of the Cape. Stems 3-4 ft., flowers duck's-egg green with black centres. 7/6 per dozen.
- I. *viridiflora* (variety)—Same habit. Flowers blue on outside of segments and pink on opening. Very attractive. 4/- per dozen.
- I. *polystachia* (Lilac)—Flowers midsummer. Flowers lilac with blue "eye." 3/6 per dozen.
- I. *scariosa*—Very early flowering. White, blossoms large. Good for pots. 3/6 per dozen.
- I. *ovata*—Flower blood-red and very conspicuous. One of the best. 6/- per dozen.
- I. *columellaris*—Flowers large deep purple or amethyst, black "eye." Stem 9 in.-1 ft.
- I. *monadelpha*—Large bright china-blue flowers on short stems.

MOREA.

- Morea *iridioides*—A robust plant flowering all the year, stems 4 to 5 ft. Blooms white, large, with gold club-shaped markings on falls.
- M. *spathacea*—Large yellow blooms with brown mark on falls, leaves 4-5 ft. long.
- M. *bicolor*—Charming species, blooms deep cream with brown marks on falls, outlined in orange shading into orange dots.
- M. *tristis*—Stems about 6 in. Flowers buff or greyish-brown. 4/- per dozen.
- M. *tripetala*—Dainty pale blue flowers, very early Spring. Stems 1 ft.
- M. *villosa* (Hybrids)—Our loveliest spring flower. Height 1 to 1½ ft. Flowers in varying shades of mauve, bronze, yellow, and white, all with definite peacock eye. 10/- per dozen.
- M. *villosa*—As above, but flowers all blue or mauve, with peacock eye. 8/- per dozen.

ORNITHOGALUM.

- Ornithogalum *Arabicum*—Very large species. White globe-shaped flowers with shining black centres.
- O. *thrysoides*—The Cape Chincheringchee. Height 2-3 ft. White starlike flowers with brown centres. 3/6 per dozen, 21/- per 100.

Ixia viridiflora.

- *O. lacteum*—Flowers smaller than the last, pure white on delicate stems.
- *O. splendens*—Magnificent species. Large orange-red blooms on 2 ft. stems. Very scarce. 10/- per dozen.
- *O. aureum*—Orange or yellow flowers resembling *O. thrysoides*. Height 1 ft.
- *O. (double)*—Probably a double form of *O. thrysoides* but flowers later and is very distinct. Very attractive, remaining in bloom for months. Very much resembles a fine Tube-rose. New to cultivation. 7/6 per dozen.
- *O. Fergusoniae*—A newly discovered species. Flowers from cream and buttercup yellow to orange. Height 9 in.
- *O. maculatum*—A small delicate species. Flower orange with dark spot on three outer petals.
- *O. Saundersae*—A giant white flowered species, 4-5 ft., blooming late in summer. Requires very dry conditions.

GEISSORHIZA.

- Geissorhiza hirta*—Resembles a Babiana. Flowers in two shades of old rose. 3/6 per dozen.
- *G. hirta* (variety)—Flowers creamy white.
- *G. secunda*—Flowers many, small. Good shade of blue. 3/6 per dozen.
- *G. splendidissima*—Flowers large and deep blue, a charming plant. 7/6 per dozen.

HAEMANTHUS.

- Haemanthus coccineus*—Very large blood-red flowers on thick spotted stems. Flowers end of summer, leaves later. 6/- per dozen. Seed, 1/- per doz., 7/- per 100.
- *H. Katharinae*—Very beautiful species, 1/6 each. Excellent for pot culture. Seed, 1/6 per dozen, 10/- per 100.
- *H. magnificus*—Most conspicuous. Flowers orange red. 1/6 each.

KNIPHOFIA.

- Kniphofia aloides*—Flowers spring and again in autumn. 5 ft. stems. Flowers red and yellow.
- *K. near K. longicollis*—Blooms spring. Stems 1-1½ ft. Flowers clear yellow and red. Very free-flowering.
- *K. near K. Macowanii*—Blooms midsummer. 2-3 ft. Fiery orange and red. Very free-flowering.
- *K. sp. from Knysna, near K. aloides*—Flower-heads larger, better shaped and darker in colour. Leaves darker and saw-edged. All these come easily from seed and as they are never really dormant that is the safest way to order.

BULBOUS PLANTS—VARIOUS.

- Schizostylis coccinea* var. *grandiflora*—Very striking, resembles a brilliant carmine gladiolus. Flowers late autumn, requires plenty of moisture. Excellent for cutting. 4/- per dozen, £1 5s. per 100.
- Nerine filifolia*—A most profuse bloomer in autumn. Flowers deep pink with narrow crinkled segments. Excellent for cutting. 4/- per dozen, £1 5s. per 100, £10 per 1,000.
- Synotia bicolor*—Resembles a small gladiolus. Flower cream marked violet. Very charming. Flowers very early spring—splendid for pot culture.
- *S. Metelerkampiae*—Flowers much larger, deep violet. Very uncommon and charming plant. 7/6 per dozen.
- *Crinum longifolium*—Handsome species—leaves 4 ft. or more. Very large heads of lily-like flowers. White, striped deep red. Splendid for tubs or large pots. 1/- each.
- *Crinum capense*—Leaves shorter and much waved. Flowers almost white, segment more reflexed. 1/- each.
- *Anioganthus* sp.—Resembles a brilliant yellow Cyrtanthus. Stem 1 ft.
- Richardia Elliotiana* var. *maculata*—Good yellow arum with maroon spot inside spathe. 6/- per dozen. Seed, 1/6 per dozen, 10/6 per 100.
- *R. Rehmannii*—Flowers a charming shade of old rose pink. Seed only, 2/- per dozen, 15/- per 100.

- **Ammocharis falcata**—Flower resembles Belladonna Lily but slightly smaller and a more agreeable scent. Leaves sickle-shaped lying flat on the ground. Flowers autumn. Seed, 2/- per dozen.
- **Eucomis undulata**—Arrangement of flowers resembles a pineapple. 6/- per dozen.
- **Vallota purpurea** or George Lily. Known in England as Scarborough Lily. Large bright scarlet flowers. Price 6/- per dozen, £2 per 100.
- **Agapanthus umbellatus var.**—Small mountain species with deep blue flowers on 1 ft. stems. 6/- per dozen.
- Dierama pendula**—5 ft. sprays of delicate lavender or pink pendulous flowers. 4/- per dozen.
- D. media**—A dwarf edition of *D. pendula*. Stems 2½ ft. Very attractive. 5/- per dozen.
- Streptanthera cuprea**—Very striking species resembles Sparaxis. Flowers tangerine with petunia coloured centre outlined by a circle in black.
- **Sandersonia aurantiaca**—miniature Lily with deep orange flowers like Chinese lanterns. 7/6 per dozen.
- **Brunsvigia gigantea**—Flowers arranged as a candelabra, bright pink. When seeds are ripe flower stalk becomes detached and rolls across the veld. 1/- each.
- **Acidanthera Muirii**—Before the flowers open, plant is conspicuous by its leaves and buds, being in two distinct shades of green. Flowers large, white or pale pink. Veined deep red. Flowers in succession for two months. 10/- per dozen. Rare.
- **Ferraria undulata**—Cream flower with bright brown waves segments. Maroon spots.
- **Veltheimia viridifolia**—Somewhat larger than *V. glauca*, leaves brilliant green. Flowers very early spring. An excellent pot plant. 1/6 each.
- Hesperantha Buhrii**—Charming species. Flowers remain closed until 4 p.m. when rose pink segments open and flowers show dazzling white.
- Amaryllis Belladonna**—Large heads of lily-like flowers, pale pink or white. Flowers late summer, leaves appear later. 2/6 per dozen.

Romulea sabulosa.

- **Hypoxis stellata**—Large golden-yellow stars on 6 in. stems. Bulbs 10/- per dozen.
- **H. stellata var. elegans**—Large star-shaped white flowers with conspicuous peacock eye. Flower very early spring. 10/- per dozen.
- **Galaxia graminea**—Plant about 3 in., resembles a yellow Oxalis. Good for pans in greenhouse. Flowers early.
- **Micranthus fistulosus**—1 ft. spikes of blue flowers in late summer.
- **M. plantagineus**—Same, with a flat leaf instead of tubular.
- Strelitzia reginae**—The handsome Crane flower. Seed only; 2/- per dozen.
- S. augusta**—Also very handsome and rare. Seeds 3/- per dozen.
- **Hesperantha Stanfordiae**—A charming novelty. Flowers larger than *H. Buhrii* very clear yellow. 7/6 per dozen.

Lapeyrouisia grandiflora—Brilliant red flowers, charmingly marked. Bulbs 8/6 per dozen. No seed for disposal.

GERANIALES. (Seeds of all these are 2/- per dozen.)

Hypoxis stellata var. elegans.

Oxalis variabiis—Delicate foliage, shell pink blooms.

O. glabra—Good white blooms with frilly appearance.

O. obtusa—Neat habit, apricot flowers.

O. obtusa var.—Pink flowers.

O. lanata—Flowers pink.

O. luteola—Flowers very good yellow.

O. species—Bigger than the others, stems and under side of leaves dark red.

COMPOSITES. (Seed only—in 1/6 packets.)

Charieis heterophylla—Beautiful little sky blue daisy with deep blue centres to flowers. 6 in. Annual.

Felicia Aethiopica—A compact 3 ft. bush covered with sky blue flowers with yellow centres. Flowers winter.

Felicia rotundifolia—Tiny sky-blue daisy with yellow centre.

Aster fruticosa—Perennial, making clumps 1-2 ft. high and as much in diameter. Covered with lavender flowers. Flower spring.

Arctotis aspera—Perennial, making clumps 4 ft. through very dark green leaves and good yellow flowers in great profusion.

A. species—Habit of *A. revoluta*, foliage grey, covering several square feet of ground. Flowers large, soft crimson with a white ring round the disc.

A. grandis—Annual with silver-blue or white flowers, grey foliage. Height 2 ft.

A. speciosa—very large flower on stems 1 ft. or more. Crimson, orange, deep red, cinnamon or yellow. Blooms 4 in. across. Perennial but where winters are severe may be treated as half hardy annual. A splendid species. Known to European nurserymen as *A. acaulis*.

A. revoluta—Prostrate, grey foliage. Flower golden yellow, red on reverse of tay florets. Flowers stand up well on good stems. Excellent for cutting.

Hellchrysum argenteum—Grey foliage, neat growing plant, slightly trailing, suitable for walls. Flowers yellow, excellent for miniature posies. Very desirable species.

Dimorphotheca fruticosa—Perennial, creeping. Bluish white daisy with blue centre.

D. nudicaulis—Annual, 1 ft. Large gleaming white blooms with petunia ring round centre.

D. cuneata—Perennial growing into a solid 3 ft. bush covered with brilliant white flowers, bronze on the reverse.

D. Chrysanthemifolia—Perennial. Bush 2-4 ft. covered with good golden yellow blooms.

D. chrysanthemifolia variety—Probably a hybrid. Perennial. Large primrose-yellow blooms slightly deeper shade on the reverse. Mauve centres. Long blooming period.

D. aurantiaca—Annual. Good orange flowers sometimes with dark green ring in centre of flower. Height 1 ft.

D. Ecklonis—Sturdy bush covered with large white blooms, blue on the reverse, blue disc.

D. calendulacea (1)—Very fine variety found last spring on the border of Namaqualand. Large blooms, ray florets primrose shading to copper, disc black usually surrounded by a peacock ring.

D. calendulacea (2)—Ray florets, good orange yellow, deep copper ring round disc. Height 1 ft.

Gorteria diffusa—Habit prostrate, many flowers of a deep orange colour. Disc inconspicuous but two or sometimes three of the brilliant ray florets show a large pear-shaped peacock mark, very attractive.

Tripteris hyoseroides, 2 ft.—Panicles of good deep yellow flowers, 2 ins. across, sometimes 5 open at a time.

Gerbera Jamesonii—The well-known Barberton Daisy, large blooms on 2 ft. stems, brilliant scarlet. Perennial. Seeds 6d. for 25.

G. Jamesonii hybrids—A splendid strain of these wonderful flowers in shades of lemon, orange, salmon, flame, etc. Seeds 9d. for 25.

Ursinia anethoides—Flowers large, orange with dark ring. Very light foliage. Height 1-1½ ft. Annual.

Venidium fastuosum—Very large brilliant orange flowers with double frill of "petals" and dark ring in centre of flower. Seed collected in Namaqualand from plants standing 4 ft. Annual.

Gazania pavonia—Compact plant. Very large brilliant orange flowers with ring of dark brown in which are attractive patterns in blue.

Gazania pavonia variety hirtella—Similar habit. Foliage soft grey. Flowers yellow.

G. Pottsii—Very large blooms in varying shades of yellow and orange, stems over 1 ft.

G. longiscapa—Very large blooms on 2 ft. stems, yellow shading to orange with dark ring.

G. pinnata var.—The most brilliant of all though somewhat smaller, flowers a dazzling brown almost red. Seeds very scarce.

Euryops sp.—Bush growing to 6 ft. covered with large yellow daisy flowers. Flowers winter.

TREES AND SHRUBS.

Bauhinia Galpini.	Leucospermum conoecarpum.	Protea grandiflora.
Bignonia Tweediana.	lineare.	cynaroides.
Calodendron capensis.	Hibiscus penduncularis.	pityphylla.
Clerodendron splendens.	Plumbago capensis.	Putterlickia pyracantha
Eriosema salignum.	Protea mellifera.	Pycnostachys urticifolia
Erythrina Zeyheri.	mellifera var. alba.	Psoralea pinnata.
Leonotus Leonorus.	barbigera.	Podalyria calyptrotrata.
Leucadendron adscendens.	Mundtii.	Sutherlandia frutescens.
argenteum.	nerifolia.	Virgilia capensis.

Packets 1/- each, containing not less than 1 doz. seeds. Prices for seedlings or young bushes on application.

NOVELTIES.

Cheironia baccifera—Charming plant, about $1\frac{1}{2}$ ft. high, more in diameter, very fine leaves, the whole plant covered with clear pink blooms succeeded by attractive red berries. New to cultivation.

Lobelia—A newly discovered species not at present determined Perennial. Height 2 to 3 ft.. Long, much-branched spikes of deep blue flowers, very showy and free-flowering. A splendid introduction. Seed only. Comes easily from seed and flowers in 6 months. Flowers all summer.

EXOTICS.

Zephyranthes candida—Small bulbous plant resembling a good white crocus. Good for edging of border.

Sprekelia formosissima—A beautiful deep red amaryllis of unusual shape. 6/- per dozen.

Euphorbia splendens—The Christ Thorn. Makes a beautiful hedge or pot plant, brilliant scarlet flowers. Quotations given for unrooted slips or for seeds per 100 or per 1,000.

SUCCULENTS.

Seed 1/6 per packet. Number of seeds according to variety of plant. Seedling plants from 6d. each. Young Aloes make charming pot plants and are easily grown.

<i>Aloe aculeata.</i>	<i>Aloe Marlothi.</i>	<i>Aloe saponari.</i>
“ Barbertonae.	“ mitriformis.	“ Salm Dyckiana, orange,
“ castanea.	“ microstigma.	“ yellow and red.
“ Cooperi.	“ latifolia.	“ striata.
“ Chabaudii.	“ Greenii.	“ Transvaalensis.
“ Davyana.	“ plicatilis.	“ tingitana.
“ Dyeri.	“ Pretoriensis.	“ variegata.
“ ferox.	“ parvibracteata.	“ Wickensii.
“ globugemma.	“ rubrolutea.	“ tenuior.
“ sp. Kimberley.	“ sessiflora.	“ brevifolia.
“ latifolia.	“ stachadefolia.	“ von Balenii.
“ longibracteata.	“ Schlecteri.	“ supra-laevis.
“ longistyla.		

MESEMBRIANTHEMUM (shrubby, i.e. conspicuous in habit and not the tiny stone plants which are listed later).

M. criniflorum syn. **Dorotheanus criniflorus**—A very pretty annual, flowers all shades. Delightful for pockets in rockwork, or for pans in greenhouse, may be treated as Portulava.

M. coalescens—Very small grey leaves, red stems trailing, suitable for walls. Covered with delightful lavender flowers, very sweetly scented.

M. coalescens var.—More solid habit of growth, making cushions covered with the lovely scented flowers.

M. explanatum—Creeping, making huge patches covered with yellow blooms. Flower early.

M. Arbuthnotiae—Very fine foliage, thin wiry stems, pale mauve flowers, creeping.

M. amoenum—Bushes 2 ft. high by 4 ft. in diameter, covered with large rose-lavender flowers.

M. Pittenii—Excellent species with large cerise flowers with white centres.

M. Watermeyeri—Trailing, good white blooms.

M. coccineum—Flowers $2\frac{1}{2}$ in. across, brilliant cerise.

M. speciosum—Grows into a large bush sometimes 6 ft. through, covered with flame coloured or deep red blooms, white centres.

M. Haworthii—Compact 9 in. plant, completely covered with large petunia coloured flowers.

Conicosia pugioniformis—Brilliant yellow flowers which catch the light and give a sparkling effect. Excellent amongst grey rocks. Perennial.

Cephalophyllum anemoniflorum—Trailing. Large blooms, apricot, pink or white. Very distinct.

C. Goodii—Trailing, large orange blooms.

C. procumbens—Flower yellow.

Carpobrotus circinaciformis—Trailing, very large showy blooms.

Piquettia Pillansii—Tall shrubby mesemb. Very distinct blooms in crimson and white.

Rochea coccinea—Flowering stems 1 to 2 ft. Heads of brilliant scarlet flowers.

R. odoratissima—Smaller, flowers cream.

Stapeliads, *S. variegata*.

” *Caralluma incarnata*.

” *N.E. Brownii*.

**Faucaria tigrina*—Leaves with sharp points growing close to ground. Good orange yellow flower.

* ” *nigricans*.

**Hereroa dolabriformis*—Leaves branched like stag's horns. Very compact.

**Huernia hystrix*.

Kalanchoe thyrsoides.

” *rotundifolia*.

**Mentocalyx veluntinum*.

**Muiria Hortensae*.

†*Rochea coccinea*.

†*Gasteria nigricans*.

Gasteria hirsuta.

Prices of plants of all these will be sent on request. They all travel quite well dried off and packed with some ventilation.

* Suitable for 6 in. pot.

† Suitable for 4 in. pot.

Citadel Press  Loop Street,
Cape Town.
